# About us

Started in 2005, YES!Delft has a demonstrated experience of incubating tech startups. Thanks to the close collaboration of a broad array of corporate partners, mentors, serial entrepreneurs, investors, startups, and academicians, we have created an environment where tech innovators are thriving. We support entrepreneurs who build complex products in challenging markets, often with a run-up time, long development trajectories and expensive prototyping involved.

Over the years we have built custom ecosystems around 9 focus areas to enable tech startups in: Artificial Intelligence, Blockchain, BioTech, CleanTech, MedTech, EdTech, Aviation, Robotics and Complex Technology. In these fields we provide startups with 360 degree support: custom startup programs, full-lifecycle services such as recruitment and funding, access to market and capital, and a community of experts, corporate partners and mentors.
